

ASTAZERO

Verifying future transports

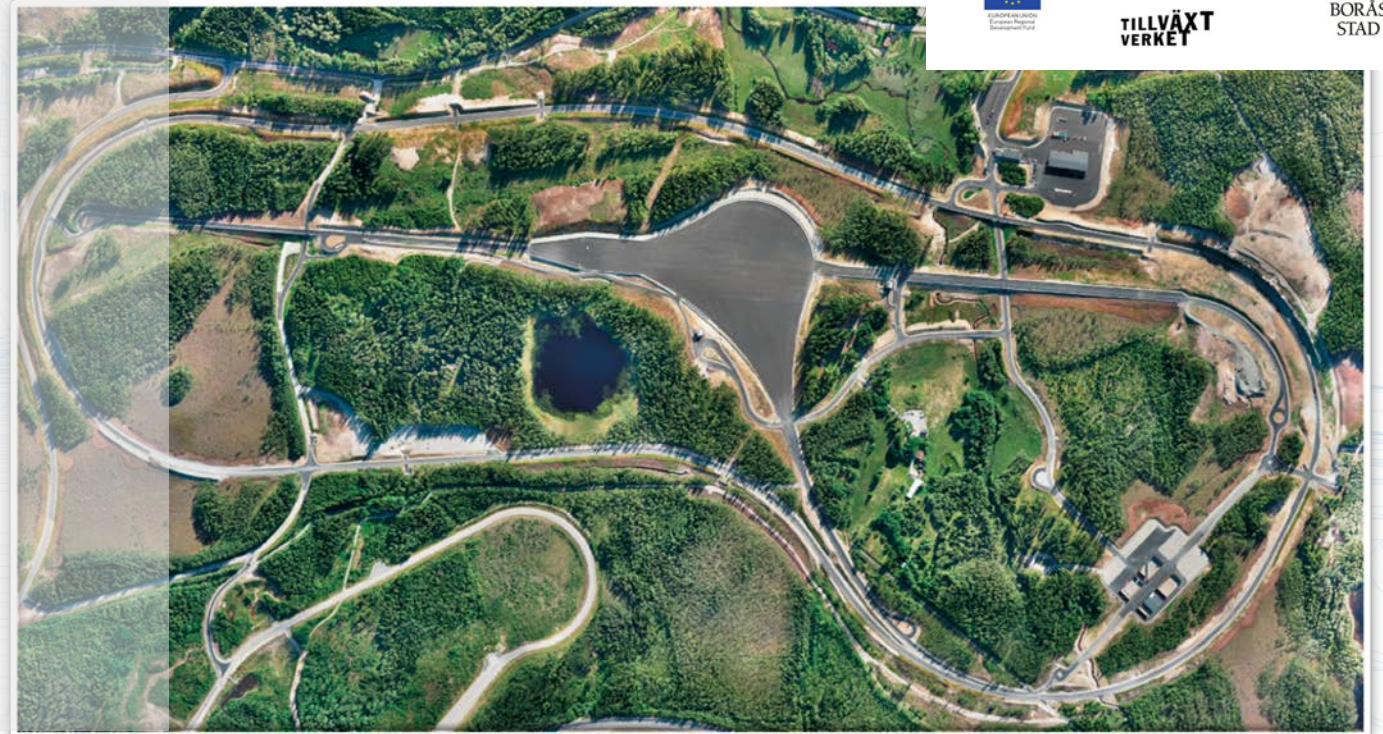

Monica Ringvik

CTO

Testbed for verification of active safety systems and automated and connected transports

THE RTO INNOVATION SUMMIT

- Designed or simulated user-like environment offering secluded, controllable and safe test conditions
- Neutral and independent arena for R&D
- Platform for collaboration between different stakeholders in the eco-system
- Offers an opportunity for exchange and mobility between research, business and society
- Opportunity to share cost for test equipment and similar

ASTAZERO

Simulated real traffic environment enabling controlled, repeatable and safe testing throughout the chain of development

THE RTO INNOVATION SUMMIT

Success factors

- **Continuous and active development** of the arena to stay ahead and be prepared
- **Strategic dialog** with the industry, academia, decision makers and society to secure direction
- **Availability of public research programs** like H2020 allows for a wide use of the test infrastructure
- **Public programs to support the development of the test bed**
